

Vacuum Filter Guide

Choose the right filter for your vacuum cleaner using the information below

For optimum filtration and cleaning, clean and/or replace your vacuum filter/s regularly

It is recommended to clean your fine dust filters every 1 month (depending on use).

HEPA filters should be cleaned or replaced every 6-12 months (depending on use).

Ways to know when your filter/s should be changed or cleaned

- When using your vacuum, if a strong or musty smell is present.
- If your filter looks damaged, bent or cracked.
- If your vacuum suction doesn't seem to be as strong your filters may be full.
- Your vacuum performance overall is low.
- Unusual or strange noises while in use.

How to clean or change your filter/s

Fine Dust filters

- Remove the filter and empty out any loose contents/rubbish.
- Rinse under warmer water for 1 minute (max 40°C).
- Leave out to dry, making sure it is completely dry before refitting to your vacuum.

HEPA filters

- Detach the HEPA filter and rinse under cold water for 2 minutes.
- Leave out in a well ventilated room/outside to dry for 24+ hours or until completely dry.
- Refit the filter back into your vacuum.

It is recommended to clean your fine dust filters every 1 month (depending on use).

HEPA filters should be cleaned or replaced every 6-12 months (depending on use).
